# Rotary Files

ITEM NO: 07900

 Rotary files are the efficient and flexible alternative to lateral filing cabinets, occupying just one-fourth the floor space of standard files while providing the same filing capacity. Rotary files provide easy access to the entire filing system from both sides. One cabinet can accommodate a wide array of Smead filing and storage systems including shelf filing, top tab filing, roll-out hanging files, roll-out media drawers and roll-out reference shelves.
 Durable, cold-rolled steel makes exterior cabinets, inner rotating unit and shelves extremely sturdy. The foot pedal holds rotating files in place for fast, effortless access, while security locks ensure records protection.
 Attractive textured finish comes in eight colors to match the decor of your office-Gray Mist, Sand, Mushroom, Adobe, Pebble Tan and Black.  Other colors available by special order.
