

Viewables® Premium 3D Hanging Folder Tabs & Labels

ITEM NO: 64910

Smead Premium 3D Tabs help you create an organized, long-lasting system to manage your important files using color. No more typing or handwriting tiny inserts for your hanging folder tabs. Simply design and print customized color-coded labels using our FREE Viewables.com online label creation tool then affix the labels to our patented pre-formed Viewables® poly tabs for files that are readable from the front, top and back. Apply the optional clear labels (Clear Label Protector) over the top for a permanent laminated approach. Create one label or many without wasting valuable label stock. Use your computer and printer to generate unique, wrap-around color-coded labels that work on all standard hanging folders.

When used on folders with tabs in the same position, a continuous line of color is created for faster filing and retrieval. Color breaks your system into smaller sections and allows misfiled folders to stand out.

Labeling System for Hanging Folders
