

Rotary Files

ITEM NO: 07900

<p> Rotary files are the efficient and flexible alternative to lateral filing cabinets, occupying just one-fourth the floor space of standard files while providing the same filing capacity. Rotary files provide easy access to the entire filing system from both sides. One cabinet can accommodate a wide array of Smead filing and storage systems including shelf filing, top tab filing, roll-out hanging files, roll-out media drawers and roll-out reference shelves.

<p> Durable, cold-rolled steel makes exterior cabinets, inner rotating unit and shelves extremely sturdy. The foot pedal holds rotating files in place for fast, effortless access, while security locks ensure records protection.

<p> Attractive textured finish comes in eight colors to match the decor of your office-Gray Mist, Sand, Mushroom, Adobe, Pebble Tan and Black. Other colors available by special order.
