**FasTab**<sup>™</sup>  
HANGING FOLDERS  
(built-in tabs for **faster** filing)

## If you have **two or more** of the following symptoms, you may suffer from **Plastic Tab Avoidance (PTA) Syndrome:**

### SYMPTOMS

- Supply cabinet anxiety
- Nightmares about drowning in piles of unused plastic hanging folder tabs
- Embarrassing plastic tab faux pas: plastic tabs do not match hanging folders
- Uncontrolled shakes when picking up a file folder
- Difficulty abbreviating long file names for tiny white hanging folder labels
- Filing-induced nausea
- Feelings of inadequacies over small tab size
- Dread of winning a new project because it means making a new file
- Voices in your head are telling you your files are worthless
- Overwhelmed by slot choices and where to insert hanging folder tabs
- Eyestrain from squinting to read tiny labels and itty bitty tabs
- Hallucinations of tab-less files tormenting your work day
- Papers piling up on your desk that need to be filed

If you suffer from two or more of the symptoms above, you are not alone. **PTA is a condition affecting millions of office workers worldwide and can get worse if left untreated.** If you are plagued with any of the aforementioned symptoms, consult your office manager immediately for the only known cure, Smead FasTab<sup>™</sup> Hanging Folders.

Of course, new FasTab Hanging Folders are not for everyone, including those who enjoy wasting time, still own a typewriter, aren't afraid of a plastic tab wound or enjoy using a magnifying glass to read file names.

Overuse of FasTab Hanging Folders may cause extreme organization especially when used with other Smead products. **Ask your office manager if FasTab Hanging Folders are right for you.** Be sure to tell them about any other filing products you are currently using.
